## How To Print Plans To Scale

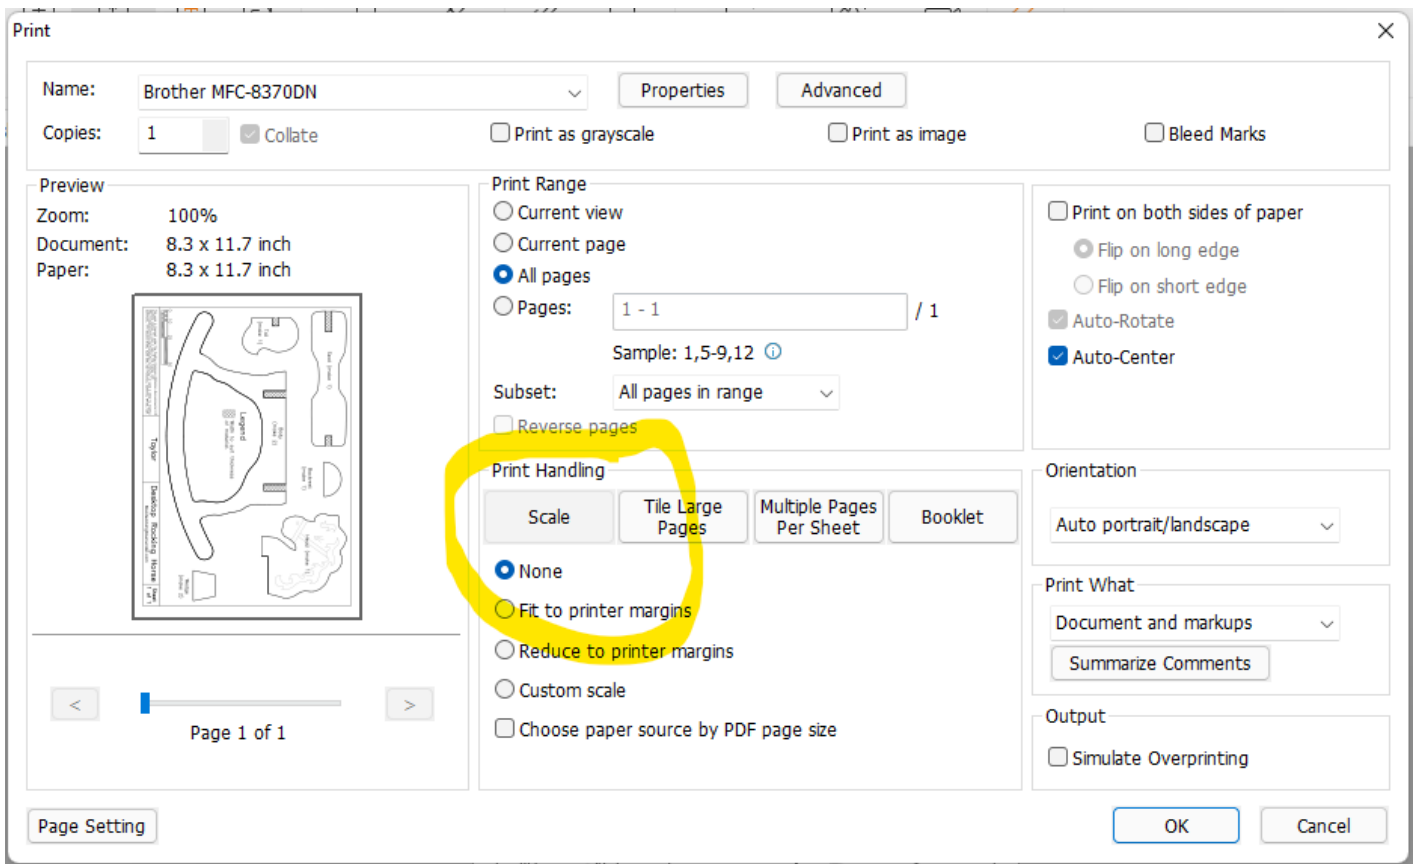

If you have a printer at home, or are about to take the PDF file to you local library in the hope that they can print it for you.

How to print the PDF file you have downloaded.

I have made the plans to fit within the printer margins which works out to be about 269mm wide and 198mm high

Here is an example of how to print to scale. I am using the free version of the FoxIT PDF reader to print to my Brother MFC 8370DN laser printer.

Chances are you don't have the same setup, but I am trying to show you how to make sure your scale is set to none or 100% under the Print Handling tab.

With a bit of luck, that should work for you.
